PROJECTS *hosted on Heroku, my projects will take a minute to load

Expens1fy

https://expens1fy.herokuapp.com/

Expens1fy is a budgeting app using React with Redux for state management, test-driven development (TDD) with Jest, Google Firebase for authentication and data storage, and Sass for styling, all bundled with webpack and hosted on Heroku. This was the capstone project for my React class.

Indec1sion

https://indec1sion.herokuapp.com/

A standard to-do list app built on React and styled with Sass, bundled with webpack and hosted on Heroku. This was the first app made for my React class.

YelpCamp

https://yelpcamppp.herokuapp.com/

This Yelp clone, specifically for campground reviews, was built with HTML, CSS, and Bootstrap on the front-end, with Node and Express on a RESTful API backend, data modeling with mongoose, data storage with mongoDB, and authentication with PassportJS; this was the capstone project for my JavaScript class.

EDUCATION:

Foothill College, Los Altos Hills, CA
A.S. Computer Science, with Highest Honors - 4.0 GPA

APR 2018 - AUG 2018

Studied advanced data structures and algorithms, cybersecurity, and python, supplementing coursework previously taken at UC Santa Cruz.
